

ROBIN GERGELYFI

JUNIOR SOFTWARE DEVELOPER

SHORT DESCRIPTION

I started out by myself learning Python first, then Java.

I began with courses on Udemy and as soon as I got into the development deeper I started out my own projects, such as Linked-in job applying/ saving bot, Instagram follower bot, fitness app - I am currently building this one.

I love coding, build things together and figuring out.

SKILLS

- Java
- PostgreSQL
- Python
- SQLite
- CSS
- Bootstrap
- HTML
- Unit Test
- Flask
- Maven
- REST

LANGUAGE

- English - fluent
- German - basic
- Hungarian - native

RELATED WORK EXPERIENCE

2022. JUNE. - NOW. SPORTEGESZSEG KFT.

After learning awhile I was fortunate enough to get a decent opportunity to help out a relative's company with IT related problems, managing database if needed and take care of small tasks related to the company's website. It is a great start, but I am looking for a serious **Junior java developer** position.

PREVIOUS WORKEXPERIENCE

Previously I worked around the EU. I worked in the UK, in Germany and in Austria. In the past I used to work mainly as a masseur.
